Professional Experience

Software Engineer, NetConnectGlobal (Orange Business India) *March 2025 – Present | Gurgaon, Haryana*

- Working on the Acort project as part of the client's engineering team.
- Developing and maintaining microservices using Python, Bash, and Perl, ensuring high performance and scalability.
- Containerizing applications with Docker and orchestrating deployments on Kubernetes.
- Leveraging Azure and AWS cloud services for scalable infrastructure and seamless CI/CD integration.

Senior Software Developer, Meritto (Nopaperforms) *March 2024 – Feb 2025 | Gurgaon, Haryana*

- Developed and maintained Telephony Module with CRM features for clients, creating a user-friendly and responsive interface.
- Designed and implemented RESTful APIs for secure data storage and retrieval, applying advanced role-based authorization.
- Integrated third-party APIs, including M-cube and Smart-ping for calling.

Software Developer, Shipway *Nov 2021 – March 2024 | Gurgaon, Haryana*

- Developed and maintained Aggregation Module: implemented features like Weight MIS, COD, and wallet balance to provide the best customer experience.
- Designed and implemented RESTful APIs for secure data storage and retrieval, applying advanced role-based authorization.
- Integrated third-party APIs, including Shopify Rest APIs and various e-commerce platform APIs.

Technical Skills

Languages: PHP, Python, JavaScript, Perl, Bash

Databases: MySQL, PostgreSQL, SQLite, MongoDB

Technologies/Frameworks: Linux, Django, CS-cart, Micro-services, Docker, Kubernetes, AWS

Developer Tools: VS Code, Git, Postman, Jira, Bitbucket, Bruno, Gitlab

Projects

Acort *Python, Bash, Perl, SQLite, MySQL, | Mar 2025 – present*

- Migrated traditional file sharing(scp/ftp/sftp) to an internal tool called e-files to make file sharing more secure.
- Maintaining the monitoring, alert and notifications of devices across France.

Meritto Prospecta (Raw Data) *DRF, Microservices, PostgreSQL | Oct 2024 – Feb 2025*

- Migrated a monolithic module to Django and microservices.
- Built Microservices and REST APIs to connect the module to the rest of the application.
- Implemented secure role-based access controls for data handling.
- Created a new source of revenue for the company.

Meritto Telephony Module *Django, Microservices, MySQL, CakePHP | Mar 2024 – Oct 2024*

- Maintained the Telephony module to provide a seamless customer experience.
- Built REST APIs across various microservices and integrated third-party APIs to build new features.

Shipway Aggregation *PHP, MySQL, MongoDB | Nov 2021 - March 2024*

- Developed and maintained an Aggregation Panel which consists of features like Weight MIS, COD remittance, and wallet balance.
- The Weight MIS feature made it easier for sellers to see and manage their weight-related issues on a single panel, and enabled the internal team to resolve seller's issues faster.
- The COD Remittance feature enabled users to manage, view, and claim COD from a single panel, also enabling the internal team to release COD on time.
- The Wallet balance feature made it easy for users to recharge their wallets and fulfil orders faster.
